

Welcome to Black Box Video's latest catalogue (Summer 2008)

Our philosophy:

At Black Box Video our philosophy, as always, is to bring you innovative electronic products of high quality which are unavailable elsewhere
Using only the finest components, we hand build every item individually - and they are made to last!

We have been working really hard on is the Mk 2 version of our website; we apologise that it has taken so long, but it has been a mammoth task - much bigger than we ever expected - and held up once again by Karen's further (and rather dramatic again!) surgery. But it is now nearly ready and we think you will agree it has been worth the wait

Not only do we give you dimensions and technical specifications but you can read Instructions for Use online, or download them in PDF format, as well as download this catalogue in PDF

Perhaps more important than anything - we also give you the prices! (Amazing how many sites leave you wondering how much money you will have to part with)

Do make sure you spend some time in the

BRAIN ZONE

where you can get all kinds of information (find your nearest ATM from wherever you are in the world, find an airline or a hotel, frequencies, television systems - it just goes on) or simply amuse yourself and have a laugh

**Jim + Karen
McAlister**

CUSTOMER SERVICE:

We believe we offer a superb "customer service". Phone us and you won't have to fight your way through endless, computerised menus. We won't leave you listening to inane music.

Phone Black Box Video and you can speak directly to a human being! But more importantly, that human is the man who designs it, the man who builds it, and the man who fixes it!

Please note that we have had to change our Email address. You can now 'write' to us at:
jim.blackboxvideo@virgin.net
(The old NTL address will still work until the end of February 2008)

As we've said, we have been busy... New units include:

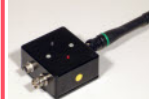

✓ The Thrifty Package, because some people felt that The Package (our original Video Sender units with Panasonic Monitor, etc) was more than they wanted to spend

✓ A Diversity Video Sender system

✓ A new Time Code system on 434 Mhz - what bliss to avoid all the various interferences, and what a sexy new Miniature Transmitter!

✓ Dual Dimmer

✓ Dual PP3 Battery Box

✓ Mk 4 version of our ever popular 836 MHz Foldback system

✓ Short and curly cables
