

# DUAL DIMMER

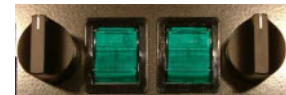

NEW !

For ten years now we have produced our very popular 3000 Watt single channel Dimmer; however, many of you wanted a two channel version in the same size box (in fact the same box) - well, we listened and here it is, with many of the new features you asked for!

These main features are:

- ✓ Two independently dimmable 1500 Watt channels
- ✓ Extremely robust construction, both mechanically and electrically, which makes the unit almost unbreakable
- ✓ Two heavy duty metal protective handles prevent damage to the Dimmer, as well as preventing the knobs from being accidentally knocked
- ✓ High quality control potentiometers fitted with knobs machined from solid anodised aluminium attached with hardened steel hex key grub screws
- ✓ Fast precision fuses on both channels to protect the control chips from blown bubbles
- ✓ Fuse blown indicators on both channels, with a spare fuse in a dummy holder
- ✓ Dual double balanced interference suppression filters, which make the Dimmer very quiet - both audibly and electrically - keeps the sound recordist happy!
- ✓ A curly mains input lead with unbreakable red 13 Amp plug

Apart from oozing quality and being a very handsome piece of kit, the **Dual Dimmer** is designed above all to be very robust and reliable

The control Triacs have a massive 250 Amp surge capability - so, combined with new very high speed precision fuses, blown chips should be a thing of the past

The **Dual Dimmer** controls are by far the best quality we have ever fitted - they feature metal shafts, metal bodies and fully sealed quality construction - in use they are silky smooth and precise

All this for only slightly more than our single channel unit ....

Price: **£245**

Height: 90 mm  
Length: 220 mm  
Width: 120 mm  
Weight: 1.32 kilo

# 3000 Watt SINGLE DIMMER

**We continue to offer our very successful, robust portable Dimmer (single channel)**

The **3000 Watt Dimmer** is robust and can dim up to 3000 Watts of tungsten light

Among its features are:

- ✓ It is lightweight, yet built in a sturdy die cast box designed to take rough treatment on the road
- ✓ This Dimmer is fitted with a flush 13 Amp output socket and shatterproof 13 Amp plug

- ✓ A calibrated dimmer level knob allows accurate settings
- ✓ Low hysteresis circuitry ensures repeatability of settings

- ✓ There is a double pole illuminated ON/OFF switch for safety
- ✓ The unit has fully screened, double balanced interference suppression

**Price: £175**

Height: 90 mm  
Length: 220 mm  
Width: 120 mm  
Weight: 1 kilo
