

MICRO POWER PACK (Mk 2)

PRICE REDUCTION!
(was £345)

The Mk 2 Micro Power Pack is so compact it clips directly onto a Beta cam's PAGlok™ plate, enabling the camera to be run from the mains. It has the same footprint as a PAGlok™ plate and is extremely lightweight - less than a kilo!

The unit is smaller and lighter than the Mk 1 version and has lots of practical features

- ✓ Uses a standard IEC connector for mains input, and the unit auto-switches to any voltage in the world
- ✓ It has self re-setting electronic overload and short circuit protection
- ✓ The Mk 2 Power Pack has two 4 pin Hirose sockets and a BP90 as well as an XLR4 auxiliary output
- ✓ A large, clear, green LED confirms voltage OK. It has a very sturdy metal carrying handle
- ✓ Total output power is 60 Watts, electronically regulated
- ✓ A mains lead included in the price

Price: £295

Height: 30 mm
Length: 110 mm
Width: 60 mm
