

DIVERSITY VIDEO SENDER SYSTEM

2.4 GHz Microwave

Diversity Receiver

Diversity Unit with Aerial Array

NEW!

VIDEO SENDERS

VIDEO SENDERS

This is our best Video Sender Receiver yet! And we have just launched this new "toy" on the market.

The clever part is that the Receiver can automatically select the best reception from a choice of four aerials. This gives the absolute minimum of picture break-up in adverse conditions.

The new Diversity Receiver will work with ANY existing Video Sender Transmitter made by Black Box Video (ie the standard or High Power Five Channel TX, the High Power Sixteen Channel TX, or even The Stamp Miniature Video Sender Transmitter) but it is especially good with our High Power Sixteen Channel unit.

The Diversity Receiver unit is housed in a rugged, lightweight all-metal case and has:

- ✓ a recessed panel with optional cover for channel select controls, display
- ✓ digital channel display
- ✓ two large push buttons change channels without the need for tools (see - we do listen to you when you tell us what you need!)
- ✓ channel memory

The Diversity Aerial Array connects via a standard SMA cable (so, just this one cable carries RF, power and switching information)

The Diversity Receiver unit can be used either with the Diversity Aerial Array, or with any standard non-diversity aerial

The Diversity System is ideal for Video Village type applications.

So, why is it so good? And is it worth the money? With non-diversity systems you have only a single aerial and you are bound to hit the odd dead spot - with our Diversity Receiver and Aerial Array all four aerials are constantly searching for the best signal. The Receiver can choose the aerial that is giving the best reception at any point in time. So, yes it certainly is worth the money!

The price includes the Diversity Receiver, the Aerial Array and an SMA lead.

Price: **£795**

	Aerial Array	Receiver
Height:	22 mm (excl Aerials) 120 mm (incl Aerials)	110 mm
Length:	70 mm	30 mm
Width:	60 mm	75 mm
Weight:	168 grms (incl Aerials)	330 grms
