# DUAL PP3 BATTERY BOX

Stock Code 125

Copyright 2008 Black Box Video

Quite simply and obviously, the Dual PP3 Battery Box houses two batteries, which gives you 18 volts of power - enough to power most Black Box Video equipment!

The two 9 volt batteries are wired in series to provide 18 volts output on a HRS4F socket.

Use the Dual PP3 Battery Box to power most of our equipment when no other power source is available.

You can use it for any of our Video Sender Transmitters or Receivers

(except The Stamp), or any of our Time Code Transmitters or Receivers.

The housing is lightweight yet very robust and comes with heavy duty Velcro to mount it anywhere convenient. You can fit it in your pocket and use our new curly HRS4 lead to connect it.

We can supply very high capacity rechargeable PP3 batteries (250MaH) which are not generally available. To charge these special batteries we can also supply a fast charger (takes about 2-3 hours, compared with the normal 16 hours).

## SPECIFICATIONS

Output	18 Volts on 1 x HRS4F (pins 1 + 4)
Height	32 mm
Length	90 mm
Width	62mm
Weight (excluding batteries)	112 grms

**Price:**
